Lamberts Point

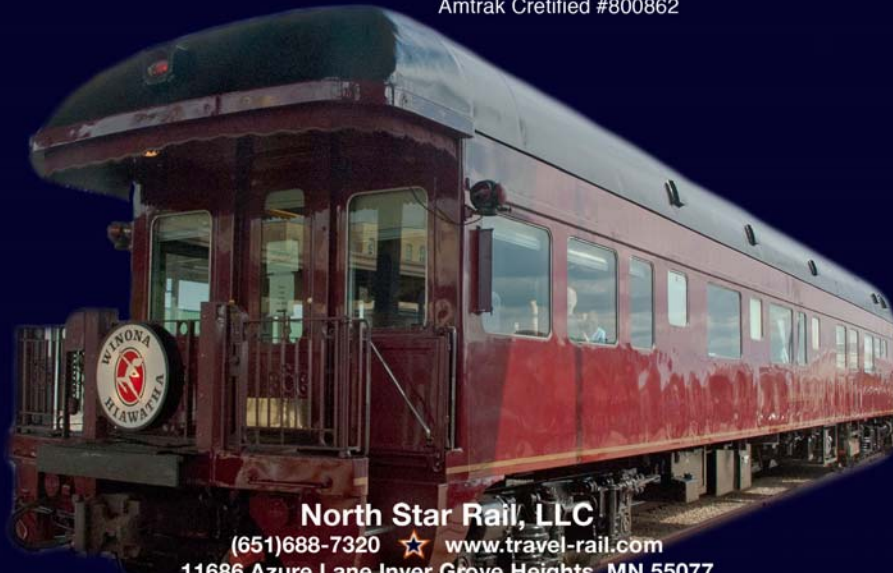

A classic from the Golden Age of Railroading, the Lamberts Point is a "heavyweight," non-streamlined car. The Pullman Company built the car in 1918 for the Norfolk & Western Railway. The Lamberts Point has all the comforts of home for you to enjoy. At the front of the car is a large kitchen and prep area, along with quarters for the crew. Down the hall is a dining room where six to eight guests may dine comfortably. In case you should need extra sleeping space, there are two Murphy beds in the dining room.

Down the hall from the dining room is a bathroom followed by Master Bedroom "A." Bedroom A is done in cherry woodwork with brass fixtures throughout and has a full bathroom. Next door is Bedroom "B," which is slightly smaller but equipped to sleep two comfortably with upper and lower berths. This room also features cherry woodwork, brass fixtures and a full bathroom.

At the end of the car is a lounge area with comfortable, cushy seating including a couch that looks out to an open platform. You can step outside to enjoy the view, or just wave to folks in the towns and cities your train passes through, much like the politicians of yesterday did when they traveled on "whistle-stop" tours. For your next trip, special event, corporate trip, or just for fun, ask for the St. Croix Valley or any of the other cars in our fleet.
